The right application for your space.

01 Efficient application

Sprayed application makes larger areas and slopes easier to seed, with suitable materials and access.

02 DIG & CUT Resilient Resort Blend

Site-led selection, planning around your use and coordinated establishment. Suitability is confirmed before application.

03 One point of coordination

Agree preparation, application and care responsibilities. Know what our team will handle before work begins.

Hydroseeding, turf rolls or seed spreading?

Hydroseeding Sprayed seeding. Your new lawn grows in the prepared ground.

Turf rolls Immediate green appearance, with watering and rooting still needed.

Seed spreading Often a lower initial cost. Needs suitable distribution and seed-to-soil contact.

Compare the same area, preparation, transport, application and care. Every method needs watering.

Hotels & larger sites

Work programme, access and maintenance-team coordination.

Gardens & villas

Ground preparation, garden use and a practical watering plan.

Know what happens at every stage.

01

Prepare

Assess soil, access and watering.
Carry out the agreed preparation.

02

Apply

Apply the selected mixture of seed,
water and protective materials.

03

Care

The agreed person follows the
watering and care plan.

From application to growth

During application

After growth

PROJECT IN PROGRESS / KOS

Galini Homes

Dig & Cut IKE is delivering the hydroseeding work. Work is in progress.

First germination does not mean readiness for use. We discuss timing around the site's development.

2-3 photographs. A location. Let's start here.

Send views of the site, ground and access. Add location, intended use and approximate area if known. We clarify whether a visit is needed before the written quotation.

What your quotation sets out

Preparation: clearance, grading and the agreed work.

Application: net treatment area, mixture, cost and VAT.

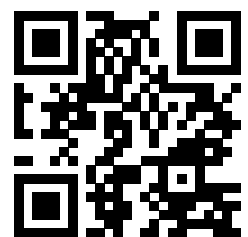

Care: who waters, what is included and how readiness is reviewed.

Prepared properly. Care planned together.

Check for dry patches, standing water or runoff. For growth concerns, send photographs, the application date and watering details. Care services are defined in the quotation.
